### **ABBREVIATIONS**

The following abbreviations are used in this document:

LB — Logbook;

OM — Operation Manual;

IM — Installation Manual;

PSU - power supply unit;

CP - control panel;

ACS - access control system.

#### 1 GENERAL PROVISIONS

This Logbook (LB) applies to Turnstile Oxgard CUBE C-03 and its modifications (hereinafter referred to as the product).

Before using the product, please read the Operation Manual (VZR.247800.001 OM) as well. The product should be installed according to Installation Manual (VZR.247800.001 IM).

The Logbook should be kept with the product at all times.

All entries in the Logbook should only be made in black ink, clearly and accurately. Erasures, blots, and incomplete corrections are not allowed. All corrections should be certified with sign and stamp of QCD.

A person who accepted the product for use shall be responsible for safekeeping of the Logbook and correctness of its completion.

The product shall be sent for repair together with the Logbook which contains information on the number of running hours since the start of the product operation, and along with Report on Technical Condition.

When transferring the product to another company, final summing records of running time should be certified with the seal of the company which transfers the product.

Persons responsible for the product during its operation and storage shall regularly fill in relevant Logbook sections.

Note - The product operation generally includes its intended use, transportation, storage, maintenance and repair.

Turnstile CUBE C-03 Logbook

#### **2 BASIC INFORMATION**

Turnstile Oxgard CUBE C-03 is designed for control of authorized people traffic, as well as for managing people passing and accessing the enterprise through checkpoints.

Basic information is given in Table 1.

Table 1 – Basic information on the product

| Product name                                      | Turnstile Oxgard CUBE C-03                            |
|---|---|

|      |                       |   |                                   |                                  |                       |   |
|      |                       |   |                                   |                                  |                       |   |

### **4 INDIVIDUAL FEATURES**

The product should be installed by qualified personnel in accordance with Installation Manual (VZR.247800.001 IM).

The passage zones shall be arranged to allow recording of passages during operation of the ASC controlled product and avoid unauthorized passages.

Note — The manufacturer reserves the right to change structure, technical characteristics and appearance of the product without further notice

Turnstile CUBE C-03 Logbook

### **5 COMPLETE SET**

## 5.1 Product components

The product components are listed in Table 5.

Table 5 – Product components

| Product designation  | Product name              | Quantity | Serial number | Note |
|----------------------|---------------------------|----------|---------------|------|
| Turnstile            | CUBE C-03                 | 1        |               |      |

Logbook

## 6 RESOURCES, SERVICE AND STORAGE LIFE, MANUFACTURER'S WARRANTY

#### 6.1 Resources, service and storage life

Assigned service life of the product is 8 years. During this period (after warranty period expiration - under separate contract), the supplier company undertakes to provide servicing for the product operation:

- 1) assist the operator company in purchasing, repairing, and replacing faulty parts of the product;
- 2) To inform independently the operating company about purchase of products which have been removed from
- 3) Where necessary, carry out, together with the operator company, assessment of the condition of the product component parts and develop measures to maintain the functionality;
- 4) Carry out work on improvement and development of the product.

Life spans and service lives for incoming components shall be determined using individual passports (logbooks).

These resources, service and storage life are valid if customer comply with requirements of current operational documentation.

### 6.2 Manufacturer's warranty

The warranty period of the product is 24 months from the date of sale by the manufacturer, provided that the consumer adheres to all the instructions given in the Installation Manual and Operation Manual.

The sale date is specified in the Product Logbook. If there is no sale date, the warranty period shall be calculated from the date of manufacture of the product as detailed in the Logbook.

If any problems occur, contact authorized dealer or the nearest authorized service center. The warranty terms and conditions provide for a free-of-charge replacement of parts, assemblies, units, etc., in which a manufacturing defect is detected. The warranty is provided if the product owner adheres to maintenance requirements given in the Maintenance Manual.

The addresses of authorized dealers and service centers are listed in the Operation Manual and are available on the website: www.oxgard.com

The warranty conditions do not provide for transportation costs and specialist's visit to the product's operation site for connecting, configuring, repairing the product or for consulting purposes.

Post-warranty service is provided at the rates set by the service center. In case of a non-warranty repair, the warranty period for replaced parts and assemblies is 3 months from the date of sending the fault-free product to the buyer's address.

All replaced parts, assemblies, units, etc. become the property of the service center which performed the warranty and post-warranty repairs of the product.

All claims for quantity, completeness and appearance of the delivered goods should be accepted by the manufacturer in writing not later than 5 (five)

business days from the date of goods receipt of by the buyer. In case of non-compliance with the above deadline, claims to the delivered product according to the listed grounds will not be accepted.

Service center has the right to refuse warranty repairs in the following cases:

- 1) if there are defects resulting from customer's violation of instructions given in the Installation Manual VZR.247800.001 (IM) and the Operation Manual VZR.247800.001 (OM);
- 2) if the product is not used for its intended purpose;
- 3) if there are signs that user has modified the product design;
- 4) if there is mechanical damage resulting from fire, impact or accident, etc.;
- 5) if there is mechanical damage resulting from operating the product in excess of the operational limits and load characteristics specified by the manufacturer;
- 6) if there is electrical damage to the product's parts and assemblies, resulting from voltage surges in the mains, incorrect connections, incorrect power cable selection;
- 7) if there is electrical and any other damage to the product's parts and assemblies due to ingress of water and other liquids;
- 8) if there is damage related to life activities of small animals and insects;
- 9) if there are signs of self-repair undertaken anywhere other than in the authorized service center, as well as defects resulting from use of non-original spare parts;
- 10) if there are malfunctions that are due to normal wear or expiry of service life of the product components (consumables, fuses and other components).

Turnstile CUBE C-03 Logbook

### **7 PRESERVATION**

Information on preservation is given in Table 9.

Table 9 – Preservation

| Date | Name of work | Duration, years | Position, surname and signature |
|------|--------------|-----------------|---------------------------------|
|      |              |                 |                                 |
|      |              |                 |                                 |
|      |              |                 |                                 |
|      |              |                 |                                 |
|      |              |                 |                                 |
|      |              |                 |                                 |
|      |              |                 |                                 |
|      |              |                 |                                 |

|                       |                              |                       |  |                             |                         |  |
|                       |                              |                       |  |                             |                         |  |
|                       |                              |                       |  |                             |                         |  |
|                       |                              |                       |  |                             |                         |  |
|                       |                              |                       |  |                             |                         |  |

### **10.1** Acceptance and handover of the product

Information on acceptance and handover of the product is given in Table 11.

Table 11 – Acceptance and handover of the product

| Date | Product condition | Decommission date | Enterprise,<br>sign | Note         |  |
|------|-------------------|-------------------|---------------------|--------------|--|
|      | Condition         | uate              | who returned        | who accepted |  |
|      |                   |                   |                     |              |  |
|      |                   |                   |                     |              |  |
|      |                   |                   |                     |              |  |
|      |                   |                   |                     |              |  |
|      |                   |                   |                     |              |  |
|      |                   |                   |                     |              |  |
|      |                   |                   |                     |              |  |

### 10.2 Information on allocation of the product during operation

Information on allocation of the product during operation is given in Table 12.

Table 12 – Information on allocation of the product during operation

| Product (component) name | Docition curnamo |            | Grounds (name, number and date of the document) |  |  |  |
|--------------------------|------------------|------------|---|--|--|--|
| and designation          | and mittais      | Allocation | Deallocation                                    |  |  |  |
|                          |                  |            |   |  |  |  |
|                          |                  |            |   |  |  |  |
|                          |                  |            |   |  |  |  |
|                          |                  |            |   |  |  |  |
|                          |                  |            |   |  |  |  |
|                          |                  |            |   |  |  |  |

## 11 PRODUCT RUNNING TIME RECORD

Information on the product running time record is given in Table 13.

Table 13 – Product Running Time Record

|      | Purpose             | Tim | ne of                           |                       | Opera  | tion time | Position,   |
|------|---------------------|-----|---------------------------------|-----------------------|--|-----------|---|
| Date | of<br>operatio<br>n | on  | operatio<br>n<br>completi<br>on | Duration of operation | since the last repair beginning of operation |           | surname<br>and<br>signature of<br>the person<br>maintaining |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |
|      |                     |     |                                 |                       |  |           |   |

### 12 RECORD OF MAINTENANCE

Information on the product maintenance is given in Table 14.

Table 14 – Record of maintenance

|      |                     | Operation time       |   | Grounds  |                         |                     |      |
|------|---------------------|----------------------|---|--|-------------------------|---------------------|------|
| Date | Type of maintenance | since last<br>repair | since the<br>beginning<br>of<br>operation | (name,<br>number and<br>date of the<br>document) | carried out<br>the work | checked the<br>work | Note |
|      |                     |                      |   |  |                         |                     |      |
|      |                     |                      |   |  |                         |                     |      |
|      |                     |                      |   |  |                         |                     |      |
|      |                     |                      |   |  |                         |                     |      |
|      |                     |                      |   |  |                         |                     |      |

|      |                     |                      |   |  |                         |                     |      |
|      |                     |                      |   |  |                         |                     |      |
|      |                     |                      |   |  |                         |                     |      |

## 13 RECORDING WORK PERFORMED ACCORDING TO BULLETINS AND INSTRUCTIONS

### 13.1 Recording work performed according to bulletins

Information about work performed according to bulletins and instructions is given in Table 15.

Table 15 - Recording work performed according to bulletins

| Bulletin | Summary of | Set deadline | Position, surname and signature |                      |                     |
|----------|------------|--------------|---------------------------------|----------------------|---------------------|
| number   | the work   | Set deadine  | completion                      | carried out the work | checked the<br>work |
|          |            |              |                                 |                      |                     |
|          |            |              |                                 |                      |                     |
|          |            |              |                                 |                      |                     |
|          |            |              |                                 |                      |                     |
|          |            |              |                                 |                      |                     |

# 13.2 Recording work performed according to customer's instructions

Information on work performed according to customer's instructions is given in Table 16.

Table 16 – Recording work performed according to customer's instructions

| Number of   | Summary of | Sat dandling | Date of Set deadline Position, surnam signature |                      |                     |
|-------------|------------|--------------|---|----------------------|---------------------|
| instruction | the work   | Set deadine  | completion                                      | carried out the work | checked the<br>work |
|             |            |              |   |                      |                     |
|             |            |              |   |                      |                     |
|             |            |              |   |                      |                     |
|             |            |              |   |                      |                     |

## 14 WORKS PERFORMED DURING THE PRODUCT OPERATION

## 14.1 Record of work performed

Information about work performed during the product operation is given in Table 17.

Table 17 – Record of work performed

|      | N                                     | Position, surnar     | Position, surname and signature |      |  |  |  |
|------|---------------------------------------|----------------------|---------------------------------|------|--|--|--|
| Date | Name of work and reason to perform it | carried out the work | checked the<br>work             | Note |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |
|      |                                       |                      |                                 |      |  |  |  |

# 14.3 Periodic monitoring of basic operational and technical characteristics

Information about periodic monitoring of basic operational and technical characteristics is given in Table 18.

Table 18 – Periodic monitoring of basic operational and technical characteristics

| Name and unit of measurement    |                  | Maximu             | Monitori            | Monitoring results |       |      |       |      |       |
|---------------------------------|------------------|--------------------|---------------------|--------------------|-------|------|-------|------|-------|
| of the monitored characteristic | Nominal<br>value | m<br>deviatio<br>n | ng<br>frequen<br>cy | Date               | Value | Date | Value | Date | Value |
| Average current in standby mode | 0.3 A            | 0.26-<br>0.33 A    | 0.5 year            |                    |       |      |       |      |       |
| Average current at passing      | 0.3 A            | 0.26-<br>0.33 A    | 0.5 year            |                    |       |      |       |      |       |
| Maximum consumed current        | 1.5 A            |                    | 0.5 year            |                    |       |      |       |      |       |
| Supplied voltage                | 12.0 V           | 10.8 -<br>13.2 V   | 0.5 year            |                    |       |      |       |      |       |
|                                 |                  |                    |                     |                    |       |      |       |      |       |
|                                 |                  |                    |                     |                    |       |      |       |      |       |
|                                 |                  |                    |                     |                    |       |      |       |      |       |
|                                 |                  |                    |                     |                    |       |      |       |      |       |
|                                 |                  |                    |                     |                    |       |      |       |      |       |
|                                 |                  |                    |                     |                    |       |      |       |      |       |
|                                 |                  |                    |                     |                    |       |      |       |      |       |
|                                 |                  |                    |                     |                    |       |      |       |      |       |

Note — The first four columns of Table 18 should be filled in by the product manufacturer, subsequent columns should be completed by a person who performed the characteristics monitoring.

#### 14.4 Information about claims

In case of the product's failure before the warranty period expiry due to the manufacturer's fault, a Claim Report shall be prepared.

All claims and requests should be sent to:

VOZROZHDENIE LLC

192289 Russia Saint-Petersburg, 66, Sofiiskaya str.

Telephone/Fax +7 (812) 366 15 94 (from 9-00 a.m. to 04-00 p.m.)

Telephone +7 (812) 366-15-94 (from 9-00 a.m. to 04-00 p.m.)

Website: www.oxgard.com

E-mail: support@oxgard.com

Information about claims should be recorded in Table 19.

Table 19 – Information about claims

| Date of receipt | Claim content | Measures taken | Date of action |

#### 15 STORAGE

The product should be stored in dry (without moisture condensation) heated rooms at a temperature of +1 to + 40 °C. The storage room should not contain acid, alkali, or corrosive gases.

The turnstile shall be permitted to be stored in its original package for a short time, no more than for 3 days, in dry unheated rooms, enclosed transport bodies.

After storage in unheated rooms, before commissioning, the turnstile should be kept in a room with normal climatic conditions for 12 hours.

Information on the product storage is given in Table 20.

Table 20 - Storage

| Da                     | te                    |                   |                 |      |  |
